

THE NEW AIR LIFT CAN BE ADJUSTED TO FIT MOST FREE ARM MACHINES.

INSTALLING MACHINE TO MOUNTING PLATFORM

1. SET CABINET MOUNTING PLATFORM IN POSITION #2 (FLAT BED POSITION) LAY NON-SLIP PAD ON MOUNTING PLATFORM.

*CAUTION - KEEP FINGERS CLEAR OF OPENING WHEN RAISING PLATFORM.

2. PLACE FREE ARM MACHINE ON PLATFORM AND LOCATE PROPER MOUNTING POSITION USING CORRECT INSERT. (INSERT TO FIT YOUR MACHINE CAN BE PURCHASED AT LOCAL DEALER.)

3. WITH USE OF NON-SLIP PAD BETWEEN MOUNTING PLATFORM AND MACHINE, MOUNTING HARDWARE SHOULD NOT BE REQUIRED.

4. TO ADJUST LEVEL OF MACHINE IN FLAT BED POSITION #2:

- A. MOVE PLATFORM TO POSITION #1 OR #3.
- B. LOOSEN 13mm NUT OF HEIGHT ADJUSTMENT STOP (REF. FIG. #1) MOVE UP OR DOWN THE REQUIRED AMOUNT AND RE-TIGHTEN.
- C. RETURN PLATFORM TO POSITION #2 (FLAT BED POSITION). REPLACE INSERT AROUND MACHINE AND CHECK FOR PROPER HEIGHT. ARM OF MACHINE SHOULD BE 1/16" TO 1/8" ABOVE LEVEL ON INSERT.

5. PLACE CONTROL CORD THROUGH CORD HOLE LOCATED ON RIGHT REAR CORNER OF MOUNTING PLATFORM. NOTE: ON CABINET MODELS THAT HAVE A SOFTFRAME EDGE AROUND MOUNTING PLATFORM, CUT EITHER FRONT OR REAR HOLE FOR CONTROL CORD.
